Care Driver Overview

A Socioeconomic Care Driver is a combination of Socioeconomic Health Attributes that indicates a potential socioeconomic health barrier for a member/patient. This reference guide aligns Socioeconomic Health Attributes to Socioeconomic Care Drivers, and provides insights you can use to build care management alerts or notifications utilizing Socioeconomic Health Attributes. These care drivers were created to help you address social determinants of health barriers to improve health outcomes for your member/patient population.

In the following pages, you will find groupings of the Socioeconomic Health Attributes, organized into care drivers, which are further grouped into higher-level socioeconomic categories. The care drivers are listed with their definitions. The ordering of the elements in this guide does not signify the ranking of them in any way. Please refer to the Socioeconomic Health Attributes Reference Guide for definitions and possible values for the attributes.

Socioeconomic Health Attributes not Mapped to Care Drivers

LexisNexis provides the following attributes that can act as proxies for the age of a patient/member, as well as information on gender. While these attributes are not mapped to a Socioeconomic Care Driver, these attributes may be used for predictive risk modeling and care management.

- Age_in_Years
- AgeOldestRecord
- AgeRiskIndicator
- Female
- SSNHighIssueAge
- SSNLowIssueAge

LexisNexis® Socioeconomic Health Attributes may be used for building or enhancing predictive health risk models and for member or patient care management. Socioeconomic Health Attributes may not be distributed to personnel within the Customer's organization for the purpose of profiling members for marketing, actuarial, underwriting individual insurance or health plan eligibility. LexisNexis® Socioeconomic Care Drivers, or health alerts based on the Care Drivers, may be distributed to personnel for member or patient care management. However, the individual attributes or attribute mapping may not be distributed directly to individual care providers.
